

ER 83-6069

19 December 1983

MEMORANDUM FOR: Chief, Arms Control Intelligence Staff

FROM: Director of Central Intelligence

SUBJECT: Intelligence Capabilities for Monitoring Arms Control

Confirming the request made in the meeting yesterday I would like more specifics in the final tab in the book for tomorrow's NSC meeting on intelligence capabilities to monitor arms control. It is only in the last page that it gets at all specific. I don't need all that palaver in the first four pages, but I would like the last page developed to specify what gaps we have had [redacted]

[redacted] how we have covered them, and what we need to improve in the future. This would specify the ability to deal with future crises while still meeting monitoring capabilities [redacted]

[redacted] the time, cost and uncertainty factors we must overcome before these capabilities can be made available, etc. In short, I want to be able to be specific, not only about our deficiencies but what our prospects are for what we have to do something about them.
